

Dan Wesson Firearms

.44 Magnum .445 SuperMag

**NEW GENERATION
445 VH4C**

New Generation VH4C

The Dan Wesson Firearms New Generation VH4C revolvers feature the famous interchangeable barrel system, adjustable white outline or black rear sight and interchangeable front ramp or patridge style sights. Laser engraving and Hogue rubber finger groove grips are standard features. Wood laminate finger groove grips can be ordered as an additional feature.

A variety of popular SuperMag and big bore calibers are offered.

The *DW Compensator System* can relieve as much as 51% of felt recoil and muzzle jump, depending on type of load being used.

Barrel assemblies made past and present are interchangeable on the New Generation Revolvers.

An additional advantage of Dan Wesson Revolvers chambered for SuperMag calibers, is that they will also chamber magnum cartridges of the same caliber. An example would be a .445 SuperMag can also chamber and fire .44 magnum ammunition. Likewise, the .357 SuperMag can use .357 Magnum & .414 SuperMag can use .41 Magnum ammunition.

Specifications

MODEL	CALIBER	WEIGHT	TYPE	FINISH

Dan Wesson Firearms

- BARREL ASSEMBLIES -

The Dan Wesson Firearms New Generation barrel assemblies are available as a standard stock item in Vent Heavy and Vent Heavy Compensated configurations. The new generation barrel assemblies will fit all previous manufactured Dan Wesson revolvers. Barrel assemblies are also available, as a special order, in Vented half under-lug, and slotted configurations. Barrel assemblies are available in blue & stainless steel. Slotted assemblies are available with contrasting color barrel, such as a blue shroud with stainless steel barrel.

All barrel assemblies come with shroud, barrel, barrel nut, & front sight. Barrel assemblies are also available drilled & tapped for Burris© scope mounts.
